ICE BAGS

Quality Medical Products, Competitively Priced

VETERAN OWNED QUALITY MANUFACTURER

QUALITY YOU CAN TRUST.

As a veteran owned company, we are proud to manufacture products at our own facility in the USA. Our products are held to the highest quality standards and are manufactured for direct sales. We also offer OEM products for distributors, equipment manufacturers and IDNs. High quality at an economical price—it's what we do every day.

TOUCH. FEEL. BELIEVE.

The only real way to understand the difference in EME quality is to hold a custom Holter/telemetry pouch, ice bag, infant cap, or fetal belt in your hand. With one touch you'll understand why customers across the nation choose EME and never go back. We'll gladly send you a sample today!

NEED MORE REASONS TO CHOOSE EME?

- Order by phone, email, fax or EDI.
- Most orders ship within 48 hours of placement.
- Our processes are ISO 9001:2015 certified, an international quality certification.
- Our continuous attention to detail in our entire supply chain assures quality.
- You will always talk to a friendly, knowledgeable sales associate who is familiar with your account.
- Our Best Value Assurance means you get up-front prices that reflect the real cost of your department's products.

THE BEST BAG ...for the Best Relief

Real ice offers the best treatment for acute chronic injuries. EME ice bags not only draw four times the amount of heat from tissue, but also, as the ice melts, release cold with a gradual drop in temperature, which reduces the chance of skin damage. EME Company manufactures a full line of high-quality disposable, refillable ice bags all insulated and specially designed with a multilayer construction to provide patients cold, dry comfort.

At EME Company, we pride ourselves on continuous attention to detail in our entire supply chain, from manufacturing to vendor performance, distribution and after-sale service.

HIGH QUALITY AND VARIETY

A GREAT COMBINATION

Choose from a wide selection of bags: large or small, with Hook& Loop attachments or string ties, or without attachments at all. Our durable bags feature multilayer construction to give cold dry comfort, last long-term, attach securely and also feature a large neck opening that's easier to fill than most bags. Because EME ice bags are manufactured to exacting standards at our own facility in the U.S.A., you can be confident you're getting a quality, dependable and affordable product that guarantees your patients experience comfortable cooling. | IB-2NB | EME Small Ice Bag without belt | 5" x 15 1/2" | 50 |

- Ice Bags are significantly more efficient in reducing skin surface temperature and 1 cm inter muscular temperatures than chemical gel packs. For best results use wetted ice.
- Cold agents that pass through a phase change from solid to liquid (ice) while cooling are more effective than those that do not (chemical gel packs).
- Chemical Gel packs do not cool skin sufficiently to induce localized skin analgesia, reduce nerve conduction velocity, or to reduce metabolic enzyme activity to clinically relevant levels.
- Merrick et al suggested that, in the absence of definitive data, better treatment outcomes may result from greater and faster cooling. Ice bags reduce skin temperatures quicker than gel packs.
